ROCKLANDER SAFETY SHOES

Technical Data Sheet

Rocklander is a well-known brand that manufactures safety shoes and personal protective equipment. They are designed to provide foot protection and comfort for individuals working in various industries, including construction, manufacturing, mining, and more.

Rocklander safety shoes feature steel or composite toe caps to protect the toes from impact and compression hazards and puncture-resistant midsoles to protect the foot from sharp objects on the ground. They are made to comply with international safety standards, such as EN ISO 20345:2011 in Europe which cover specifications like impact and compression resistance, puncture resistance, and protection against electrical hazards.

Specifications:
